

APPRENTICE AND TRAINEE PROGRAM

Stanwell's Apprentice and Trainee Program provides structured opportunities for you to develop your skills in-line with industry training standards. As a Stanwell Apprentice or Trainee, you will be supported by our team of highly experienced and knowledgeable mentors that want to see you grow as much as you can during the program.

Expressions of interest are welcomed via the Current Vacancies page.

What can you expect?

Values

Safe, Responsible and Commercial – enjoy a work environment where our values clearly define daily behaviours and expectations.

Structured learning program

Achieving your qualification will include formal training at TAFE, internal Stanwell programs and mentoring.

Hands on experience

Your structured learning program will be complemented by practical on the job training alongside qualified trades people and leaders.

Mentoring

You will have access to a number of Stanwell mentors who are actively involved in the program.

Rotations

Based on your discipline you may have access to a number of internal and external rotations to maximise your practical experience.

What disciplines are available?

Disciplines available through the Apprentice and Trainee Program vary each year based on business and industry requirements.

Examples include:

- Boilermaking
- Business
- Electrical Instrumentation
- Laboratory Techniques
- Mechanical
- Warehousing Operations

Our Apprentice and Trainee positions are based across our Power Station sites.
