

UNIVERSITY PLACEMENTS

Are you curious and motivated and want to gain an insight in to a work environment?

University placements give you a chance to gain valuable workplace experience, to enhance your knowledge and skills and put into practice what you have learnt so far at university. At Stanwell, students are given the opportunity to work under the supervision of experienced professionals within their discipline; across our diverse asset portfolio and business areas.

Stanwell offers two types of University Placements:

Vacation Practice

Disciplines

Vacation Practice placements are open to any discipline and can be based at any of our operational sites or corporate office.

Co-Operative

Disciplines

Co-Operative placements are open to both Mechanical and Electrical Engineering students and are targeted towards those in their third and fourth year of their degree.

Duration

Placements are for a maximum of twelve weeks between November and February.

Duration

Placements range from six to eight months.

What can you expect?

Based on agreed learning plans and business requirements, Vacation Practice placements can include:

- Project work introducing you to business processes and systems
- Interaction with a number of employees across different teams and sites
- Working within a team contributing to their success
- Learning from subject matter experts and gaining experience under the supervision of Stanwell employees

What can you expect?

Based on university subject learning outcomes and business requirements, Co-Operative placements can include:

- Assisting with project work, plant or process investigations
- Developing asset management systems and tools
- Developing documentation or procedure updates
- Learning from subject matter experts and gaining valuable experience under the supervision and guidance of qualified engineers

Jacob completed a Co-Operative placement with Stanwell and later successfully secured a Graduate role. This is what he had to say about the experience.

How to apply:

Opportunities are dependent on business requirements. However, please visit Stanwell's Current vacancies page to view any open opportunities. For further information, please contact earlycareerprograms@stanwell.com

The work I was given challenged me to learn about new concepts which was epitomised by Stanwell being my industry supporter for my thesis. As a student and graduate, Stanwell supported my development, helped foster an attitude of self reliance and supervision. Stanwell has also been very supportive of my involvement with the Army Reserve.

We encourage you to explore our website for more information about what Stanwell does and how we operate.
